

Patch Test Consent Form TINT

Patch Testing involves placing small amounts of the substance against the skin and affixing them in place for 48- 72 hours. The testing site is then monitored for local reaction. Potential adverse events include rash at the site, infection, or delayed skin reactions. There is a possibility of an allergic reaction to pigments.

Pigment contents are: Aqua, Silver Nitrate, Ammonium Acryloyldimethyltaurate/VP Copolymer, Ammonia, Aqua, Alcohol denat, Acacia Catechu Heartwood/Achillea Millefolium Aerial Part/Aesculus Hippocastanum Nut/Calendula Officinalis Flower/Camellia Sinensis Leaf/Carthamus Tinctorius Flower/Dichroa Febrifuga Lour Root/Galla Chinensis Cecidium/Hypericum Perforatum Whole Herb/Juglans Regia Hull/Juniperus Communis Stem and Leaf/Solidago Virgaurea Herb/Urtica Dioica Leaf/Vaccinium Myrtillus Fruit/Vitex Agnus-Castus Fruit/Vitis Vinifera Seed Extract, Carbomer, Ascorbic Acid, Sodium Hydroxide.. A patch test is advisable however it does not ensure a client will not have an allergic reaction.

I CONSENT THE PATCH TEST: I have received a patch test on the date below. The patch test has been received and it releases Shimmer Spa LLC, and assistant(s) from any liability related to any allergies or other reaction to applied tint pigments. I have been informed that reactions can occur at any time in the future. Sun exposure can also cause a reaction with the pigments (colors).

Client: _____
